

The Lytx Surfsight Solution

A flexible, video telematics solution designed to seamlessly integrate advanced AI-driven capabilities and insights into your product offerings and help fleets protect their people, assets and reputation.

Prevent risk in the moment

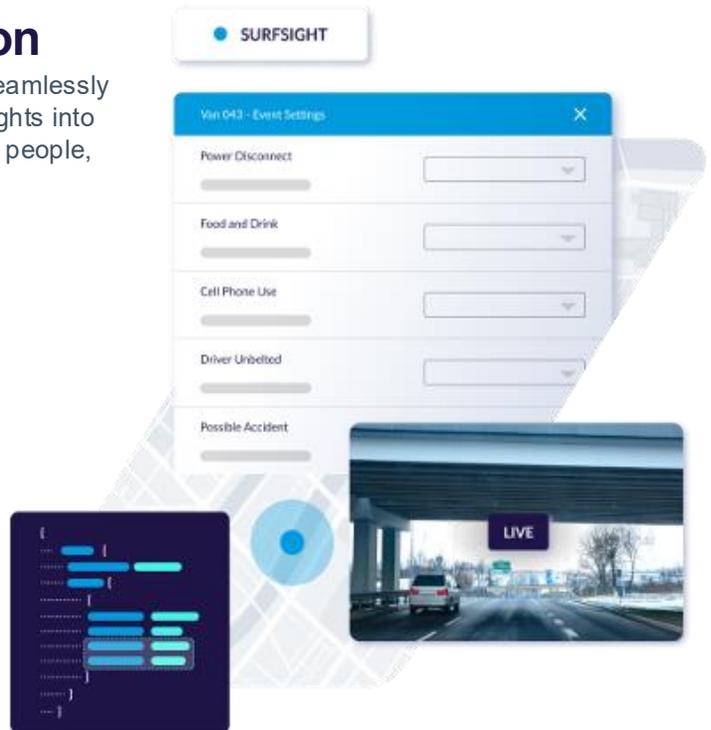

Timely alerts help drivers self-correct risky behavior and keep managers focused on what matters.

Defend with video context

Real-time insights and immediate exoneration evidence to support risk management and performance improvement.

Integrate and scale fast

A modern platform with APIs and integration capabilities to embed video into existing fleet technology workflows.

Scalable Innovation for Fleet Technology Leaders

- Seamlessly integrate advanced AI-driven video telematics into your fleet product or ecosystem
- Upsell more value, increase stickiness, and reduce churn
- Embed cutting-edge video safety with easy-to-install hardware and a robust API suite
- Incorporate video quickly to stay competitive and increase win rate

Flexible solution for commercial fleets

- Built for fleets that rely on their existing telematics system and want seamlessly integrated video insights
- Comprehensive configuration options and privacy controls to align with unique needs
- Detect and mitigate risk, driver behavior and vehicle events, through automated in-cab coaching
- Understand the “why” behind the data to drive smarter decisions on efficiency, risk, and performance

Powered by Lytx Surfsight AI Dash Cam

Introducing a next-generation dash cam that combines rugged hardware with cutting-edge technology to deliver unparalleled performance in fleet video telematics.

Built to Last

Rugged construction and reliable performance built for the demands of the road—day in, day out

Designed to Inform

Captures clear, actionable data to give the visibility and insights fleets need, when they need them

Ready for the World

Globally connected and regionally configured to fit fleets of every size, anywhere they operate

Feature Highlight

- **Award-winning Machin Vision and AI** to proactively detect risky driving behavior.
- **In-cab DMS** detects distractions and risky behaviors including cell phone use, smoking, Food and Drink, Unbelted Driver, and General Distraction.
- **Road-facing ADAS** including Following Distance, Critical Distance, and Rolling Stop, with Pedestrian, and Red Light coming soon.
- **LCD touchscreen** for faster, more intuitive installation, configuration, and use.
- **In-cab audio and visual alerts** to empower drivers to self-correct in the moment.
- **Security and compliance controls** including Passenger Limit, with Driver Change and Unfamiliar Driver coming soon.
- **Tamper-resistant design** to deter removal, vandalism, and theft.
- **Record button** to quickly tag key events for easier retrieval.
- **Over-the-air updates** to keep firmware current without manual downloads.

BUILT-IN CAPABILITIES:

GPS, accelerometer, cellular, and Wi-Fi connectivity
